

JOVEN REY V. FLORES

Software Developer | Koronadal City, South Cotabato | +63 967 781 9501 |
floresjovenrey26@gmail.com

PROFESSIONAL SUMMARY

Software Developer with hands-on experience building web and mobile applications using PHP, Laravel, JavaScript, React, Next.js, and MySQL. Combines over 5 years of technical support and systems administration experience with strong application development skills. Proven ability to design relational databases, develop secure REST APIs, and deploy containerized applications to production environments. Passionate about clean code, robust system architecture, and modern DevOps practices, with a strong track record of troubleshooting complex systems and delivering scalable business solutions.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, Bootstrap

Backend: PHP, Laravel, REST APIs, MVC Architecture

Mobile Development: React Native (Expo), Android Development (Java)

Databases: MySQL, PostgreSQL, SQL Query Optimization, phpMyAdmin

DevOps & Cloud: Docker, AWS (EC2), Linux (Ubuntu), VPS Deployment, Nginx, Apache

Tools: Git, GitHub, VS Code, Android Studio, Postman

Testing & Debugging: Application Debugging, Performance Optimization, Error Analysis

Networking & Security: Network Administration, Firewall Configuration, Endpoint Security

Design & Multimedia: Adobe Photoshop, Illustrator, Premiere Pro, Canva

PROFESSIONAL EXPERIENCE

Full Stack Web Developer

Freelance / Academic & Real-World Systems Development
2023 – Present

- Designed and developed multiple full-stack systems for healthcare, payroll, and municipal health services.
- Built scalable backend systems using Laravel MVC architecture with RESTful API integration.
- Developed role-based access control (RBAC) systems for multi-user environments (Admin, HR, Staff, Finance).
- Managed full development lifecycle including database design, backend logic, and frontend integration.

- Deployed systems using Docker and configured development environments for scalable applications.

IT Technical Staff / Developer Support | 96.9 ENERGY FM Radyo Astig | 2017–Present

- Maintain and support mission-critical computer systems, networks, and broadcast infrastructure.
- Develop and manage internal software solutions and databases.
- Troubleshoot application, server, and network issues.
- Manage system upgrades, security configurations, and technical documentation.
- Collaborate with stakeholders to identify process improvements and technology solutions.
- Support multimedia production, automation systems, and digital workflows.

IT Technical Staff | 99.1 LIKE RADIO | 2011–2016

- Administered network infrastructure and workstation environments.
- Installed, configured, and maintained software and hardware systems.
- Implemented preventive maintenance procedures and security controls.
- Provided technical support and resolved complex system issues.

PROJECTS

Family Life Care Management System

- Developed a comprehensive healthcare and insurance management platform for patient care and administrative operations.
- Built modules for patient management, billing, insurance claims processing, reporting, and role-based access control (RBAC).
- Implemented using Laravel, Filament, PostgreSQL, and Docker with modern web development practices.
- Designed scalable architecture following MVC principles and optimized database structure for performance.

Health Management System – Lutayan, Sultan Kudarat

- Developed a municipal health management system to digitize patient records and healthcare services.
 - Implemented modules for patient registration, medical records tracking, and health reporting.
 - Improved efficiency of healthcare staff by reducing manual record-keeping and enabling centralized data access.
 - Supported local health operations with faster and more accurate reporting workflows.
-

Payroll Management System – GenSan Operations General Santos City

- Developed a payroll management system to automate salary computation, deductions, and payslip generation.
 - Built core modules for employee management, payroll processing, and audit-ready payroll logs.
 - Implemented role-based access control (RBAC) for HR, finance, and administrative users.
 - Integrated **face recognition-based attendance system** to improve time tracking accuracy and prevent manual time-in/out manipulation.
 - Automated payroll calculations based on verified attendance data, reducing processing time and improving payroll accuracy.
-
- Led development, database design, and system implementation.
 - Applied software engineering principles, system analysis, and responsive UI/UX design.

EDUCATION

Bachelor of Science in Information Technology | Green Valley College Foundation Inc. | 2021–2025

Diploma in Electronic Data Processing | Candor Technological College Inc. | 2013–2015

CERTIFICATIONS

Computer Systems Servicing NC II
